Education

# MAJOR OPTIONS: Elementary Education

MINOR OPTIONS: Secondary Education

Follow us: HUschoolofeducation @HU\_SOE

## WHY CHOOSE EDUCATION?

- Educators equip the next generation of leaders with the tools to achieve their dreams.
- A career in teaching can lead to many job opportunities beyond the classroom.
- Teaching is one of the most direct ways to make an impact that can transform communities.

## OUR PROGRAM:

### Elementary Education Major

Within the Department of Curriculum & Instruction (C&I), faculty prepare candidates to become teachers in Elementary (1-6), Secondary (7-12), and Special Education (K-12). The B.S. in Elementary Education and the minor in Secondary Education are designed to prepare teachers that can facilitate optimal teaching and learning for all students, particularly in urban communities. Candidates in the program must pass the applicable Praxis exams administered by ETS, before completing the program.

### Program Highlights:

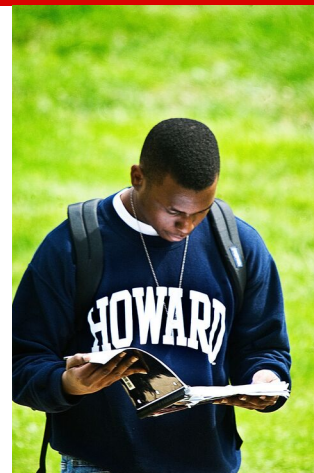

- Students will have a STEM intensive curriculum, which prepares them for a competitive career in education.
- The undergraduate program includes a domestic and global student teaching experience.
- Here are a few locations where our alumni are currently teaching: Washington, D.C., New York City, Chicago, Louisville and Spain.

*\*We encourage all first year and transfer undergraduate applicants to apply using the Common Application.*

**\*100% of program graduates pass the Praxis exams needed for teacher certification.**
